(54) Title: A PACKAGE FOR STORING GOODS IN A PRESERVATIVE STATE AS WELL AS A METHOD FOR MAKING SUCH A PACKAGE

(57) Abstract: The invention relates to a package for goods having a bar-code (2) and a temperature indicator (3) including a contrast medium between a front wall and a base wall. According to the invention, the temperature indicator (3) is placed beside the bar-code (2) in close vicinity of an outer code bar (4) thereof without covering the bar-code, in order to, on one hand, in a first temperature state without hindrance enable scanning of the bar-code, but, on the

other hand, after a colour alteration in the contrast medium make scanning impossible, more precisely by making an outer neutral field (5) opaque. The invention also relates to a method for marking packages.
